Unit 4 Applications Of Probability

UNIT 4 • APPLICATIONS
OF PROBABILITY

Lesson 2: Conditional
Probability Instruction
U4-112 CCSS IP Math II
Teacher Resource W E
4.2.2 3. Determine if
TEN and FT are
independent.

Remember that events

Access PDF Unit 4 Applications Of Probability

A and B are independent events if $P(B|A) = P(B)$ or if $P(A|B) = P(A)$. Compare $P(T|E) = \frac{1}{12} \approx 0.083$ and $P(F|T) = \frac{1}{12} \approx 0.083$ with $P(T) = \frac{1}{8} = 0.125$ and $P(F) = \frac{1}{12} \approx 0.083$.

UNIT 4 • APPLICATIONS OF PROBABILITY Lesson 2: Conditional ...

- In Unit 4:
Applications of
Probability, you will
start by defining

Access PDF Unit 4 Applications Of Probability

events, applying the addition rule, and learning about independence. Then you will progress toward conditional probabilities and the multiplication rule. This builds into using combinatorics to count and calculate probabilities.

Unit 7: Applications of Probability

In this unit, students will:

- take their previously acquired knowledge of probability for simple and compound events and expand that to include conditional probabilities (events that depend upon and

Access PDF Unit 4 Applications Of Probability

interact with other events) and independence. • be exposed to elementary set theory and notation (sets, subsets, intersection and unions). • use their knowledge of conditional probability and independence to make determinations on whether or not certain variables are independent.

UNIT 6: APPLICATIONS OF PROBABILITY

Understand ...

In probability and in its applications, we are frequently interested in finding out the probability that a certain event will not occur. An important point to understand here is that “event A does not occur” is a separate event that

Access PDF Unit 4 Applications Of Probability

consists of all the possible outcomes that are not in A and is called "the complement event of A."
